Production Release Dates:

- ### Reports: September 15, 2021
- ### APIs: September 29, 2021

Reporting and Analytics

Reports

- **Applicant Dashboard:** The Applicant Dashboard was modified. This report includes visualizations and tabular data showing total applicants by eligibility and veterans preference for one or more vacancies. The report was updated to include an optional prompt for application location, a new page/tab for applicants by location, and to include columns for USAJOBS Job Status and Announcement Locations on pages with tabular data. The report was also updated to include grouping on pages with tabular data and to modify the report grouping setting to ungroup rows when exporting to Excel.
    o Team Content > USA Staffing Packages and Folders > Hiring Data Warehouse > Application

- **Applicant List Report:** The Applicant List Report was modified. This report provides tabular data displaying a list of all applicants, applicants by eligibility, and applicants by location for one or more vacancies. The report was updated to include columns for USAJOBS Job Status and Announcement Locations. The report was also updated to include grouping and to modify the report grouping setting to ungroup rows when exporting to Excel.
    o Team Content > USA Staffing Packages and Folders > Hiring Data Warehouse > Application

- **Application History Report:** The Application History Report was modified. This report provides tabular data displaying a list of the vacancies an applicant has applied to, including data about their progress through the selection process. The report was updated to include an optional prompt for application location and to include columns for USAJOBS Job Status, Announcement Locations, and Certificate Filter Locations. The report was also updated to modify the report grouping setting to ungroup rows when exporting to Excel.

APIs

The new **API Developer Platform** was deployed. The API Developer Platform https://developer-stage.usastaffing.gov/ provides customers with details about USA Staffing's interconnections, completing security paperwork, implementation instructions, technical documentation for the Data APIs, and Frequently Asked Questions. The technical documentation and data definitions tabs include details for all Data APIs (currently deployed and coming soon) to assist with planning.

In addition to the API Developer Platform, the following APIs were deployed:

- **Time to Hire API:** The Time to Hire API was deployed. The Time to Hire API provides detailed data about the time it takes to complete subtasks related to hiring a federal employee through USA Staffing. The API will return data about each request including days to hire and critical time to hire dates. In addition to the data specifically related to the time to hire request, direct links to associated APIs are provided in the returned JSON for the announcements, customers, offices, organizations, requests, new hires, and vacancies APIs.

- **Organizations API:** The Organizations API was deployed. The Organizations API provides detailed data about each organization in USA Staffing. The API will return data about the organization including tenant code. In addition to the data specifically related to organizations, direct links to associated APIs are provided in the returned JSON for the customers and offices APIs.

- **Offices API:** The Offices API was deployed. The Offices API provides detailed data about each office in USA Staffing. The API will return data about the office including office locations. In addition to the data specifically related to offices, direct links to associated APIs are provided in the returned JSON for the organizations, announcements, applications, customers, new hires, and vacancies APIs.

- **Customers API:** The Customers API was deployed. The Customers API provides detailed data about each customer in USA Staffing. The API will return data about the customer including agency, department, and address. In addition to the data specifically related to customers, direct links to associated APIs are provided in the returned JSON for the organizations, announcements, offices, requests, and vacancies APIs.

- **Requests API:** The Requests API was deployed. The Request API provides detailed data about a request made through USA Staffing. The API will return data about the request and links to the sub-entities request appointing authorities, request locations, mission critical occupations, request positions and work schedules. In addition to the data specifically related to the request, direct links to associated APIs are provided in the returned JSON: vacancies, staffing tasks, onboarding tasks, new hires, customers, and certificate applications APIs.

- **New Hires API:** The New Hires API was deployed. The New Hires API provides detailed data about each new hire created in USA Staffing. The API will return data about the new hire and links to the sub-entities new hire aliases, hew hire appointing authorities, interconnection transmissions, mission critical occupations, notes, and phone numbers. In addition to the data specifically related to new hires, direct links to associated APIs are provided in the returned JSON for the offices, requests, and onboarding tasks APIs.
