

USA Staffing

Lock Down Triggers: Vacancy and Admin Areas

This document outlines various areas within the Vacancy and Admin levels and the trigger that locks down any changes from occurring with that area of the system. If you have any questions, consult with your USA Staffing Account Manager.

Vacancy Level		
System Area	Trigger when Locked Down	Permission Profile Functions that can Impact the System Area
Request > Request	When the Request is Approved.	Users can delete a manually created Request that has not been
Information		approved if they have Delete Requests enabled in their permission
	Some information and selections made in the Request are able	profile. Requests that are submitted by a Hiring Manager User or
	to be modified within the Vacancy after the Request is	through RPI can never be deleted.
	approved.	
Vacancy > Position	This is never locked down.	Users must have Release/Update/Remove to USAJOBS enabled in
Information > USAJOBS		their permission profile to update an announcement already released
Announcement Settings	If the announcement is released to USAJOBS, it will need to be	to USAJOBS.
	updated for updates to appear on USAJOBS.	
Vacancy > Position	This is never locked down.	Users must have Release/Update/Remove to USAJOBS enabled in
Information > Position		their permission profile to update an announcement already released
Settings	If the announcement is released to USAJOBS, it will need to be	to USAJOBS.
	updated for updates to appear on USAJOBS.	
Vacancy > Position	When the announcement is released to and open on USAJOBS.	No permission profile function can change this.
Information > Position	Applications do not need to be submitted.	
Descriptions		Users must have View Position Information and Edit Position
	This includes the ability to check or un-check 'Interdisciplinary'.	Information enabled in their permission profile to make changes.

Vacancy Level		
System Area	Trigger when Locked Down	Permission Profile Functions that can Impact the System Area
Vacancy > Supporting Documents > Supporting	When the announcement is released to and open on USAJOBS. Applications do not need to be submitted.	No permission profile function can change this.

	created vacancies.	enabled in their permission profile order to make changes.
		Permissions apply to all default settings, not specific to any one area
		of the system.

Note, throughout the Admin area, the ability to modify items based on the settings identified in the "Permission Profile Functions that can Impact the System Area" column will apply if you have that permission enabled within the Profile assigned to your HR User account for the Owning Office of the applicable system area.

System Area	Trigger when Locked Down	Permission Profile Functions that can Impact the System Area
Admin > Libraries > Position Descriptions	Can be edited at any time. They cannot be deleted if in use.	Users must have Create/Edit or Delete Position Descriptions permissions enabled, as applicable, to make changes.
Admin > Libraries > Announcement Items	Can be edited and deleted at any time. Changes only apply to newly created vacancies.	Users must have Create/Edit or Delete Announcement Items enabled, as applicable, in their permission profile to make changes.
Admin > Libraries > Competency Networks	Can be edited at any time. They can never be deleted but content within them can be.	Users must have View Competency Networks and Create/Edit Competency Networks enabled in their permission profile make any changes.
Admin > Libraries > Competency Network > Network Information	Can be edited at any time.	Users must have Create/Edit Competency Networks enabled in their permission profile to make changes.
Admin > Libraries > Competency Network > Competencies	Can be removed (deleted) from a competency network at any time; however, it will never be permanently deleted. Changes to a single competency applies to all instances of the competency being used, regardless of Network it is assigned to.	Users must have Create/Edit Competency Networks, Create/Edit Competencies and Delete Competencies enabled in their permission profile to make changes in a competency network.
	Changes will appear in new instances of the competency being used at the Vacancy and/or Assessment Package Template level.	

Note, throughout the Admin area, the ability to modify items based on the settings identified in the "Permission Profile Functions that can Impact the System Area" column will apply if you have that permission enabled within the Profile assigned to your HR User account for the Owning Office of the applicable system area.

System Area	Trigger when Locked Down	Permission Profile Functions that can Impact the System Area
Admin > Libraries > Competency Network > Items	Can be removed (deleted) from a competency network at any time; however, it will never be permanently deleted if it has been used. Changes to a single item applies to all instances of the item being used, regardless of Network it is assigned to.	Users with Create/Edit Competency Networks and Delete Items enabled in their permission profile can make changes in a competency network.
	Changes will appear in new instances of the item being used at the Vacancy and/or Assessment Package Template level.	
Admin > Libraries > Eligibilities	Can be edited and retired at any time. Changes only apply to newly created vacancies.	Users must have Create/Edit or Delete Eligibility Library Items permissions enabled, as applicable, in their permission profile to make changes.
Admin > Templates > Announcement Templates	Can be edited at any time. They cannot be deleted if in use. Changes made after creation only apply to newly created vacancies.	Users must have Create/Edit or Delete Announcement Templates permissions enabled, as applicable, in their permission profile to make changes.
Admin > Templates > Assessment Package Templates	This can never be deleted. The assessment associated with the Package Template can be edited and deleted if the Assessment Package Complete box is unchecked. Changes made after creation will only apply to newly created vacancies using the Assessment Package Template.	There are a variety of permission functions applicable to Assessment Package Templates that can affect what can be done in this area.
Admin > Templates > Instructional Templates	Can be edited and deleted at any time. Changes only apply to newly created vacancies.	Users must have Create/Edit or Delete Instructional Templates enabled, as applicable, in their permission profile to make any changes.

Note, throughout the Admin area, the ability to modify items based on the settings identified in the "Permission Profile Functions that can Impact the System Area" column will apply if you have that permission enabled within the Profile assigned to your HR User account for the Owning Office of the applicable system area.

System Area	Trigger when Locked Down	Permission Profile Functions that can Impact the System Area
Admin > Templates > Notification Templates	Can be edited at any time. If the template had been used, deleting it will simply retire it. If it had never been used, deleting will fully delete it from the system.	User must have Delete Notification Templates enabled in their permission profile to make changes.
	Changes made after creation only apply to notifications sent after the change is made.	
Admin > Workflow >Tasks	Can be edited at any time. They cannot be deleted if in use (i.e. assigned to a vacancy or a new hire).	User must have Credit/Edit Tasks or Delete Tasks enabled in their permission profile to make changes.
	Changes only apply when newly assigned to workflows, vacancy's or new hires.	
Admin > Workflow > Workflows	Can be edited at any time and deleted at any time.	User must have Delete Workflows enabled in their permission profile to delete a workflow that is not in use.
	Changes only apply when newly assigned to vacancy's or new hires.
