- 'Assessment Battery Name': The name of the USA Hire battery within the assessment package.
- 'Assessment Battery Number': The USA Hire battery number within the assessment package.
- 'Assessment Flags': A concatenated list of assessment flags associated with the assessment package.
- 'Questionnaire Assessment Methods': A concatenated list of the assessment questionnaire methods (e.g., Biodata (Professionally Developed), Training & Experience (Self Evaluation), Narrative Response Collection (For Rating), etc.).
- 'USA Hire Type': The USA Hire type (e.g., Standard, Custom, Premium) associated with the assessment package.

Reports

Candidate Inventory Report

The Candidate Inventory Report was created. This report provides tabular data about vacancies and certificates with candidate inventory enabled, including counts of the number of applicants opting in to have their application shared by candidate inventory.

- Team Content > USA Staffing Packages and Folders > Hiring Data Warehouse > Production Metrics

User License Last Modified Report

The User License Last Modified Report was created. This report shows the latest date/time for certain fields within the User License data package to provide an indication of the age of data currently available for reporting. Please note this information is an approximation of the age of data available for reporting based on recent system activity.

USA Staffing Data APIs

Applications API

The Applications API was updated to include an additional column for Application Originally Submitted Date/Time.

Application API Sub-Entities

The following Application API sub-entities were updated to allow direct data pulls (rather than through the Application API) and to enable sorting of the data based on the DW Last Modified Date/Time.

- Application/Applicant
- Application/Documents
- Application/Eligibilities
- Application/Locations
- Application/Ratings
- Application/RecruitmentSources

Certificates API Sub-Entity for Certificate Metrics

A new sub-entity link for Certificate Metrics was added to the Certificates API to enable reporting on certificate-level metrics (e.g., total referred, total selected, total available, total not selected).
