Introduction

OPM employs agile IT development techniques in the development and maintenance of the USA Staffing Upgrade system. This means we have the ability to update priorities through frequent, iterative releases based on changes in the hiring landscape or the identified needs of the collective customer base.

The USA Staffing Upgrade Release Notes provide an overview of the most recent functionality deployed to the USA Staffing Stage and Production environments.

To learn more about features that already exist in USA Staffing Upgrade and to review the upcoming release schedule for the USA Staffing Upgrade Stage and Production environments, please visit [USA Staffing Upgrade Resource Center](#).

Completed System Functionality

The items outlined in this section include newly added functionality in the USA Staffing Upgrade. Examples of functionality found in this section can range from corrected issues within the system, changes that enhance the system's performance, enhancements made to the user experience specific to existing features based on feedback received, or new functionality that improves the system's already robust set of capabilities. As you review this section, you may see the following icon  which designates the completion of feature that was previously identified in the Feature Backlog & Glossary on the [USA Staffing Upgrade Resource Center](#).

Staffing Functionality

- Updated the New Vacancy request's Staffing Approach page to force the selection of an Office for the new vacancy if more than one Office is listed in the dropdown of available offices.
https://help.usastaffing.gov/USAS/index.php?title=Staffing_Approach ○ When there is one Office available for selection, that Office will be populated along with the Workflow as designated by system settings or as assigned in the Vacancy Default Settings.
https://help.usastaffing.gov/USAS/index.php?title=Creating_a_request
- When there is more than one Office available selection, no Office will be populated and the user must choose from the list of available Offices. While there is a Workflow populated prior to the Office being selected, the Workflow will adjust following the selection of the Office as designated by system settings or as assigned in the Vacancy Default Settings.
https://help.usastaffing.gov/USAS/index.php?title=Manage_Vacancy_Default_Settings
- Updated the Additional Selection request to allow the linking of additional vacancies after the approval of the Request. Users will find a Staffing Approach page to the right of the Request's summary page where they can search for and link additional vacancies when that request is in a Pending Recruitment or Active Recruitment status.

https://help.usastaffing.gov/USAS/index.php?title=Linking_an_additional_vacancy_to_an_approved_additional_selection_request

- Removed the option to reuse the Position Description from a previous request from the interface of the Additional Selection request type. Users are now expected to add the Position Description(s) for each created Additional Selection request rather than relying on the linked Vacancy to assign those Position Descriptions. Requests already created using this capability will not be affected by this change.
https://help.usastaffing.gov/USAS/index.php?title=Linking_an_additional_selection_request_to_a_vacancy
- Added a warning message to the user when cancelling a Request or Vacancy that the cancellation of either cannot be reversed. These warning messages are displayed when the user is asked to select a reason for cancellation.
https://help.usastaffing.gov/USAS/index.php?title=Cancelling_a_vacancy
- Added an option on the Announcement Locations page to copy the locations list from another Vacancy. Users may click the “Copy Locations” option from the gear icon and enter the Vacancy Number from which they intend to copy the list of locations. Please note that:
 - Any locations already entered in the Announcement Locations page will remain following the copy.
 - Locations that are duplicates of locations already assigned to the Announcement will not be copied from the other Vacancy
 - If the Announcement Location pages in both vacancies are set to show counts of vacancies by location (rather than by announcement), the assigned count for each location will copy over.
https://help.usastaffing.gov/USAS/index.php?title=Copying_locations_from_another_vacancy
- Added a warning message to the Announcement Locations page to update changes to USAJOBS if the announcement has already been released.
https://help.usastaffing.gov/USAS/index.php?title=Announcement_Location
- Increased the size of the Hiring Path Clarification Text field on the Announcement Text page to better accommodate text of up to 500 characters in length.
https://help.usastaffing.gov/USAS/index.php?title=Announcement_Text
- Updated the Announcement Release screen to continue to show the Remove button option for cancelled or expired vacancies that have previously been released to USAJOBS and have not been removed. While announcements should not normally need to be removed from USAJOBS after cancellation or expiration, there

are times when cancellations or expirations have occurred prior to the Open Date and are not formally removed from USAJOBS. The presence of the Removal button allows this to be accomplished without the submission of a support ticket to USAJOBS.

https://help.usastaffing.gov/USAS/index.php?title=Removing_an_announcement_from_USAJOBS

- Added a release validation message to the Announcement Release screen when the user has selected more than one of the following hiring paths: The public, Exclusive posting, Internal - does not appear on USAJOBS. USAJOBS will reject an announcement that includes more than one of those hiring paths so USA Staffing will not allow the user to release until this condition is met.

https://help.usastaffing.gov/USAS/index.php?title=Editing_Hiring_Paths

- ACWA Assessments for 60 Series will be re-released to the Assessment Package Template library for all USA Staffing organizations the week of May 7th. We will send an AB message when all ACWA AP Templates are available for use again in the Upgrade.

- ✦ We reviewed Legacy USA Staffing data and determined that approximately 60 series covered almost all ACWA vacancies announced in the previous two years. If your agency needs an assessment that is not included in these 60 series, please submit a Footprints ticket to let us know which additional series you need. The series to be published include:

0105	1102	0301	0201	1910	0343	0560	0025	0901	2210
1170	0501	1801	0018	1101	1103	0346	0110	0341	0996
0950	1150	1165	1176	1035	0028	0193	0080	1083	0150
0020	1147	2001	2003	2010	2130	0101	1146	1104	2101
1171	1811	1173	0391	2032	2030	1082	0170	0132	0130
0107	2150	1001	0685	0993	0965	1420	1412	1015	0023

- ACWA Assessment Package (AP) Templates may be copied into grade 5/7 vacancies in the same way that all AP Templates are copied – by searching on series, grade, name, etc. ACWA AP Templates will be titled “ACWA [Series Number]”.

https://help.usastaffing.gov/USAS/index.php?title=Manage_Assessment_Package_Templates

- As in Legacy USA Staffing, ACWA Templates will include a ‘Rating Schedule’ and a ‘Min Quals’ assessment questionnaire.

- ✦ The Rating assessments have been designed to hide all rating and scoring information from HR users, removing the need for any special user training or access restrictions required in Legacy USA Staffing.
- ✦ The 'Min Quals' assessment includes two minimum qualifications questionnaire items (one for each grade 5/7) and placeholder response options that must be updated by users. Users should also configure Screen-outs based on the responses they build. (Note: In Legacy, users were restricted from customizing response options, but that restriction has been removed.)
- ✦ Agencies have much greater flexibility in setting up the Min Quals assessment than they did in Legacy USA Staffing. You may choose to allow individual HR users to configure them on a vacancybyvacancy basis, or you may elect to build agency-specific templates with customized minimum qualifications language suited to your agency's needs. Please remember to update your business processes/SOPs accordingly.

Onboarding Functionality

- Added the following forms for use in USA Staffing:
 - DHS 11000-5, CP 528 https://help.usastaffing.gov/USAS/index.php?title=New_Hires_Forms

Hiring Manager Functionality

- None

Administrative Functionality

- Made a number of updates to the User Management page:
 - Administrators may now delete permissions directly from the list of assigned permissions if they have the deletion permissions for that particular Office or Customer. An Office designated as a Primary Office may not be deleted until and new Primary Office designation has been assigned.
https://help.usastaffing.gov/USAS/index.php?title=Deleting_an_office_or_customer_from_a_user_record
 - When the Add/Modify Permission button is clicked, the assigned permissions list will be hidden from view so that there is more screen space for the assignment of new permissions by user type and so those profiles with larger numbers of assigned permissions will have greater proximity to the Save and Cancel buttons.
https://help.usastaffing.gov/USAS/index.php?title=Adding_an_office_or_customer_to_a_user_record
 - Each User Type now has a name filter so that the Administrator can filter down the list of selectable Offices or Customers by name to find the correct one to assign a permission profile to.
https://help.usastaffing.gov/USAS/index.php?title=Adding_an_office_or_customer_to_a_user_record
 - When closing the User Management page, the Administrator will be returned to the User Administration page where they can elect to find or create another user account.
https://help.usastaffing.gov/USAS/index.php?title=Manage_Existing_Users
- Enabled the ability to delete a Customer if that Customer:
 - Is not associated with a Request or Vacancy
 - Is not assigned to a permission profile for a Hiring Manager User or Onboarding User account
