Stage Release Notes

Release 15.8

July 14, 2023

OFFICIAL USE NOTICE: This material is intended exclusively for use by USA Staffing Customers and is not to be distributed without approval from the USA Staffing Program Office. This communication may contain information that is proprietary, privileged, confidential, or otherwise legally exempt from disclosure. If you have received this document in error, please notify the USA Staffing Program Office immediately and delete all copies.

Completed System Functionality

The USA Staffing Release Notes provide an overview of the most recent functionality deployed to the USA Staffing Stage and Production environments. The  icon designates the completion of a feature previously defined in the Program Roadmap. To learn more about upcoming features and the release schedule for the USA Staffing Stage and Production environments, please visit the [USA Staffing Resource Center](#).

Staffing Functionality

Assessment Package

Enabled the ability to import items with more than 26 responses when using the *Copy from File* functionality. Additional responses will be listed as AA, AB, AC, etc.

Certificates

Added the *CTAP/ICTAP Well Qualified Score* to the Certificate/Stored List Details section of the Certificate/Stored List Information pages when this score is used as a filter.

Reviews

Modified the *Review Assignments* to no longer assign the requesting Hiring Manager as a Subject Matter Expert (SME) Reviewer when creating an SME review. HR users may still manually assign the *Requester* if they would like the Hiring Manager to be involved in the review process.

New Hire

The following form has been added in USA Staffing:

- USSC ARI – Authorization for Release of Information

The following form has been updated in USA Staffing:

- OCHR-EOD 11 – Employment Agreement for Locally Hired Spouses and Family Members

Selective Service System Interconnection

Added a new response of *Pending Further Action* to the *Task Results* field for the *Verify Selective Service System Registration* task to allow for a more accurate status of the registration verification process.

Changed the *Task Result* associated with existing error codes to help prepare the system to allow for Users to manual retrigger the interconnection when a true error occurs:

- If the integration results in Error 999, the *Task Result* will now be updated to *Error - See Notes* and display the currently associated task note: "The Selective Service interconnection system is currently experiencing technical difficulties (code: {#}). Follow your agency policy to continue with verification."
- If the integration results in Error Code 91 or 92 the *Task Result* will now be updated to *Other – See Notes*, the corresponding message from the Selective Service System will continue to display the currently associated task note:
 - Error 91: "There are no records in the Database before January 1, 1960"
 - Error 92: "To register for Selective Service you must be at least 17 Years Old"

For a summary of task results and recommended actions for the *Verify Selective Service System Registration* task, please review the Selective Service System Interconnection FAQ on the [USA Staffing Resource Center](#).

Hiring Manager Functionality

No updates.

Administrative Functionality

Modified the search functionality in the Customer Administration section to improve performance by removing the progressive search and adding a *Search* button, which requires users to enter the *Customer, City, State, or Agency Reference Code* and click *Search* to perform a search.

Classification Functionality

No updates.

USA Hire Functionality

Added the *USA Hire Status* to the Applicant Overview, Applicant Record, and Applicant List to better inform HR users of the applicant's status.

Reporting and Analytics

Reporting and analytics enhancements can be reviewed in the Release Notes section of the Reporting and Analytics page on the [USA Staffing Resource Center](#).
